

## WRM-HW Extended

**WRM-HW Extended** is a device for remote management systems. WRM-HW can be used as a part of Wapice Remote Management system (WRM). Designed by Wapice, it has complete customization opportunities. **WRM-HW Extended** is designed to meet the requirements of industrial conditions, and has a wider operating environment than WRM-HW Lite. Moreover, the case is further designed compared to Lite.

### Product Family

*WRM (Wapice Remote Management)*

## TECHNICAL DATA

Processor	ARM9
Flash	2MB DataFlash 256MB NANDFlash
RAM	64MB SDRAM
RS-232	1
USB	2 x host
Output voltage	1 x 5V/1A, 1 x 12V/0,5A
Relay Output	1 x 96V/2A
Digital Output	3 x 0/5 V
Analog/Digital Input	16 x 100V
1-wire	1
CAN	1
Connections	WLAN/GSM/GPRS/3G
Shock Sensor	Yes
Supported Operating System	Linux, RTOS
Operating Temperature	-35C to +65C
IP Class	IP 54
High Input Voltage Range	10,8 – 96 Vdc
Weight	528 g
